PERFO

Interlocking PE/PP tiles for reinforcing soft ground

**Ideal for providing a firm surface on grass
runways, taxiways, helipads and parking areas**

- durable, all weather surface prevents rutting
- increased flying season & revenue
- safer, more secure take-off & landing surface
- secure interlocking tiles prevent standing edges
- tiles do not rot, UV and frost resistant
- grass grows back through the tiles within weeks, preserving the character of grass airstrips
- tiles allow water to pass through them. Natural drainage maintained
- planning permission not normally required
- no special tooling or skills required for installation
- airfield's own labour force can install the system in a short time
- tiled matting can normally be rolled or pressed into unprepared soft grass surface
- tiles can be removed later, if required
- low cost when compared to alternative surfacing options

**Easy to install in
3 simple steps**

**Transforms soft ground
into a stable base**

**Grass grows back
through the tiles**
